

INTRODUCING THE NEW RANGEMASTER .338 COUNTER TERROR / JUNGLE SHORT BARREL RIFLE

Rangemaster Precision Arms has provided Jungle Warfare equipment and training in some of the most hostile environments in the world. The specific requirements of this terrain has resulted in our engineers designing the optimum barrel length (for both 308 and 338 calibres) and Suppression.

Rangemaster Precision Arms is uniquely able to provide this capability due to its recent investment in barrel manufacturing technology. Our close relationship with Primetake Ltd enables our two companies to tune the rifle and ammunition to the exact requirements of our customers. This includes range and acoustic signature in the jungle canopy.

- The ULTRA is made of high grade aluminium billet, of which critical load bearing parts are made of Milspec 7075 alloy.
- The ULTRA incorporates our world beating RPA Quadlock Actions and Triggers.

- The ULTRA is left closing stock, which incorporates our new Patented Pending toughened Steel Hinge mechanism. This leaves the bolt able to operate at all times. This rifle has been specifically designed for Counter Terror Operations in both an Urban and Jungle environment. The compact footprint of the rifle when folded enables the operator to infiltrate the target area discretely, and if necessary the rifle can be carried in the pannier of a motorcycle.

The ULTRA incorporates fully adjustable length of pull, cheek and butt plate.

- The ULTRA incorporates our new slim 30 MOA picatinny side rail system. This ensures that the picatinny rail is only where the operator needs, and that there is no surplus metal adding unnecessary weight in the field.
- The ULTRA uses our new improved military 2 stage trigger system.
- The ULTRA incorporates our new configurable pistol grip. This ensures that all operators can enjoy the maximum comfort and stability in the firing position.

- The ULTRA uses the exceptional ACCURATE-MAG magazine systems.
- The ULTRA is available in all colours

TECHNICAL SPECIFICATIONS .308

Calibre	308 7.62x51mm NATO
Barrel length	16" 406mm Twist
Twist Rate	1 turn in 10" 1 turn in 254mm
Overall Length	48.5inches to 37 inches 940mm - 1230mm
Length Folded (including Muzzle Break)	37.75" to 28" 960mm to 710mm
Weight included bipod and Steiner riflescope	16.2lb to 14.5lb 7.35kg to 6.6 Kg
Magazine capacity	10
Threaded for Muzzle break or Sound	Yes

Fitment for Night vision	Yes
Mount for Torch/Laser designator	Yes
Moderator / Suppressor	Not included
Muzzle brake included	Yes
Sling attachment points	Yes
Supplied with Hard waterproof Case	Yes

TECHNICAL SPECIFICATIONS .338

Calibre	.338 Lapua Magnum 8.58x71mm
Barrel length	18 inch or shorter or as required
Twist Rate	1 turn in 10" (1 in 254mm)
Overall Length	51.5 inch or less 1310 mm
Length Folded (including Muzzle Break)	41 inches of less 1050mm
Weight included bipod and Steiner Scope	18 lb 8.3 Kg
Magazine capacity	5
Threaded for Muzzle break or Suppressor	Yes

Fitment for Night vision	Yes
Mount for Torch/Laser designator	Yes
Muzzle brake included	Yes
Moderator / Suppressor	Not included
Sling attachment points	Yes
Supplied with Hard waterproof Case	Yes

Comparisons and Reasons for purchase of the RPA ULTRA series.

All Small Arms manufacturers will understandably market their latest products as being the optimum choice in the field. We believe that even a superficial analysis of these claims centres around the design of their new chassis system. The heart of accurate shooting lies within the Action, Trigger and Barrel. RPA Defence, although mindful of the importance of attractive and practical chassis design, has remained true to designing and building the best Actions, triggers and barrels.

Our company is the only Tactical Small Arms company which consistently wins the Queen's Medal and Grand Aggregate Prize at the Imperial Competition at Bisley each year. It is also used by both the GB Palma Team (who recently won the World Championship) but also the US Marine Corps Target Rifle Team.

Our recent developments in using advanced tool steels for our actions (the first in the world), co-operation with the Material Sciences Departments of leading UK Universities, has resulted in a new generation of actions. Working closely with the leading UK ammunition manufacturer (Primetake Ltd) has enabled our company to achieve levels of accuracy and range rarely achieved before. Furthermore our recent investment in the latest Barrel Manufacturing machinery from both the US and Germany has enabled our company to enhance this accuracy even further.

We offer a respected independent review to assist in our claims:
